

Make your home A CYBER SECURE STRONGHOLD

Don't lose anything

1 **Back up your data** and run regular software updates.

Secure your devices

2 Secure electronic devices with **passwords**, PIN or biometric information.

Disconnect

3 **Don't use the same computer for work and leisure.** If you don't have another computer, try creating a different user on the system with limited permissions (guest).

Make it hard

4 **WiFi:** always change the default router password.

Protect yourself

5 **Install antivirus software** on all devices connected to the internet.

Protect your data

6 Review the **privacy settings** of your social media accounts.

Keep your apps up-to-date

7 Review your **apps' permissions**, update them and delete those you don't use.

Manage your passwords properly

8 Choose **strong and different passwords** for your email and social media accounts. Use password managers.
