

CYBER SECURITY *with children*

1 Check the **security and privacy settings** of smart toys.

2 Use **parental controls** to safeguards your child's online activity.

Change the default factory **password** and keep software up to date.

3

4 **Talk to your child** about cyber security. **Listen to their online experience** and explain to them the importance of being just as safe online as offline.

5

Remember: Follow trusted sources for up-to-date factual information. If you become a victim of cybercrime, always report it to your national police.
